

KISANDU WETHMAL

SOFTWARE ENGINEERING (APPLIED AI) UNDERGRADUATE

PROFILE

Innovative Software Engineering & Applied AI Undergraduate with hands-on experience building scalable web and mobile ecosystems. Proficient in Full-Stack development (React, Node.js, Spring Boot, PHP) and specialized in integrating Machine Learning models into real-world applications. Proven track record of architecting end-to-end solutions—from RESTful microservices and MySQL databases to AI-powered predictive systems and Computer Vision tools. Passionate about leveraging ML and Data Science to build smarter, more efficient SaaS products and automated software solutions. A collaborative Agile team player dedicated to writing clean, maintainable code that solves complex problems.

WORK EXPERIENCE

Software Engineer (Internship)

2026 -PRESENT

Ministry Of Digital Economy

Full-Stack & AI Development: Built scalable applications using React and Spring Boot, integrating AI-driven automation to optimize government digital services. Developed communication, mentoring, and problem-solving skills, transferable to software development roles.

Systems Architecture: Developed secure RESTful APIs and MySQL databases to support mission-critical ICT infrastructure for public sector use.

ICT Teacher

2023 -2025

Self-Employed

Provided ICT theory and programming lessons to school students, creating personalized exercises and mini-projects.

Developed communication, mentoring, and problem-solving skills, transferable to software development roles.

- 📍 Kandana, Sri Lanka

SKILLS

Programming Languages

Python, Java, C#, JavaScript, HTML, SQL, PHP

Web Technologies

React.js, Node.js, Spring Boot

Mobile Technologies

React Native

Databases

MySQL, MS SQL, PostgreSQL, Firebase, MongoDB

UI Design

Figma

Tools

Git, Postman, Visual Studio, Visual Studio Code, IntelliJ IDEA, Android Studio

Soft & Transferable Skills

Problem solving, Task & priority management, Teamwork & collaboration, Communication, Research & learning ability

INTERESTS

- Software Engineering & Cloud Computing
- Full-Stack Web & Mobile Development
- Artificial Intelligence & Machine Learning (Applied AI)
- Computer Vision & Predictive Analytics
- UI/UX Design & Human-Computer Interaction

EDUCATION

BSc (Hons) in Software Engineering, Software Engineering

2023 -Present

School of Computing | Coventry University London

Current GPA : 3.82 / 4.00

BSc (Hons) in Health Information and Communication Technology, Health Information and Communication Technology

2022 -On Hold

School of Computing| GWUIM| University of Kelaniya

Year 1 GPA: 3.45 / 4.00

Advanced Diploma in Software Engineering, Software Engineering

2022 -2024

School of Computing | National Institute Of Business Management

GPA: 3.64 / 4.00

Assured Diploma in Information Technology, Information Technology

2020 -2021

School of Computing | Esoft Metro Campus

GPA: 3.50 / 4.00

PROJECTS

Corporate Visa Application (Sri Lanka)

Associated With MINISTRY OF DIGITAL ECONOMY. Reactjs (Vite) - TanStack - i18next - jsPDF - Node.js (Express) - bcryptjs

DOCUMENT & TASK MANAGEMENT SYSTEM

ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY. Reactjs (Vite) - ExcelJS - Node.js (Express) - bcryptjs - PDFKit

Pizza Mania

Associated with NIBM. Android Studio (Java) — SQLite — Maps API — Firebase — REST APIs

SafeRoute AI

Associated with NIBM. React Native - FireBase - Weather Api - Googlemap Api

Vertex

Associated with NIBM. C# - .NET - Crystal Reports - Microsoft SQL

- SaaS Product Development & Entrepreneurship
- Database Architecture & Secure API Design
